This course introduces various study epidemiological study design, the basic principles and methods of epidemiology, with an emphasis on critical thinking, analytic skills, and application to clinical practice and research. Furthermore, the course will provide tools for critically evaluating medical and scientific literature and fine-tune the necessary skills to practice evidence-based medicine.

We demonstrate the ability of nondestructive optical imaging techniques such as second-harmonic generation (SHG), two-photon fluorescence (TPF), fluorescence lifetime imaging (FLIM), and Raman spectroscopy (RS) to monitor biochemical and mechanical alterations in tissues upon collagen degradation. Decellularized equine pericardium (EP) was treated with 50 μ g/mL bacterial collagenase at 37 °C ...

Americium can exist in solution in the +3, +4, (V), and (VI) oxidation states. Simple aqueous ions of Am^{+3} and AmO_2^{+2} (VI oxidation state) are stable in dilute acid, but Am^{+3} is the predominant oxidation state. Free radicals
