x A life-threatening complication of coronavirus disease 2019 (COVID-19) is acute respiratory distress syndrome (ARDS) refractory to conventional management. Veno-venous extracorporeal membrane oxygenation (VV-ECMO) is used to support ARDS patients failing conventional management. Scoring systems to predict mortality in VV-ECMO remain unvalidated in COVID-19 ARDS.

Dissection is a nightmare for animals, many of whom are killed specifically to be cut apart - which many people don't realize. The millions of animals used for this purpose include frogs, who are caught in the wild; pigeons, who were seen drowned to death in a PETA exposé of a leading dissection-supply company; and fetal pigs, who are removed from the wombs of their pregnant mothers at ...

Galen contributed a substantial amount to the Hippocratic understanding of pathology. Under Hippocrates' bodily humors theory, differences in human moods come as a consequence of imbalances in one of the four bodily fluids: blood, yellow bile, black bile, and phlegm. Galen promoted this theory and the typology of human temperaments. In Galen's view, an imbalance of each humor corresponded with a ...
