Fifth grade teachers being evaluated by their students' test scores might have a greater interest in providing feedback to fourth grade teachers to better prepare their students for fifth grade. There is no way, however, to statistically measure a teacher's ability to pressure other instructors in estimating the teacher's effectiveness in raising her own students' test scores.

The grade (also called slope, incline, gradient, mainfall, pitch or rise) of a physical feature, landform or constructed line refers to the tangent of the angle of that surface to the horizontal. It is a special case of slope, where zero indicates horizontality. A larger number indicates higher or steeper degree of "tilt". Often slope is calculated as a ratio of "rise" to "run", or as a ...

Abstract. To test the hypothesis that lecturing maximizes learning and course performance, we meta-analyzed 225 studies that reported data on examination scores or failure rates when comparing student performance in undergraduate science, technology, engineering, and mathematics (STEM) courses under traditional lecturing versus active learning.
